Events or companies Born to Grow (now Seedtime) has been featured in:

There was a very <u>noticeable</u> difference in the amount of fruitage this year compared to last year... I really got to give credit where credit is due, so I thank God and thank you for sharing the knowledge and wisdom to the masses."

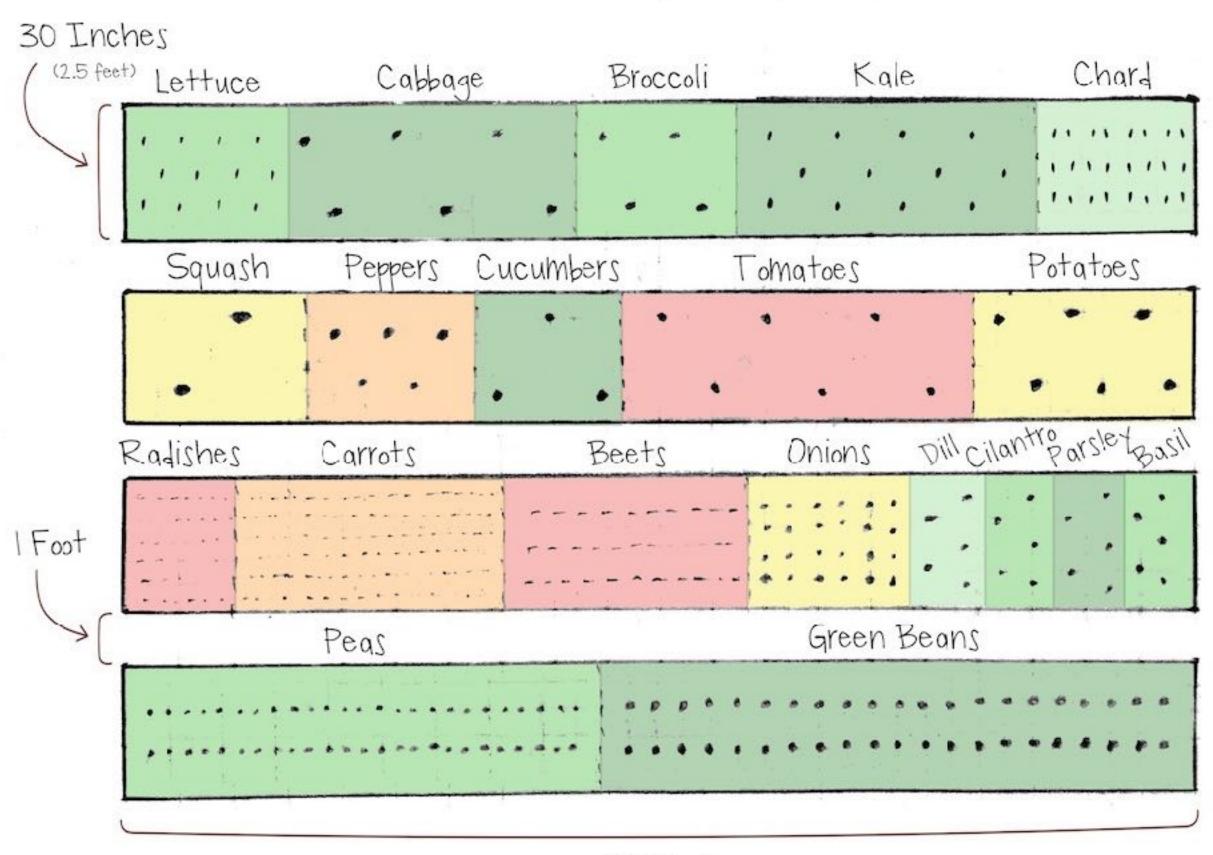

Roy Kim - New York USA

There was only one small space in the yard that got much sun so I put in an 8 foot by 4 foot garden of Russian kale, Georgia southern collards, and black seeded Simpson lettuce in September... The lettuce needed more sun and didn't do well, but the kale and collards did well all winter... I ate fresh greens all winter."

James Hunt - Tennessee USA

 - 2. Cherry tomatoes
- 3. Choose the specific varieties you want to grow
- 4. Different types of seeds

- 3. Exceptions (including varieties)

2 - ALL ABOUT SEEDS

ALL ABOUT SEEDS

- Good seeds and good soil really are the two pillars of a successful garden
- 2. "Without high-quality seed, all the other activities are moot." NOG
- 3. What about GMO, hybrid, open pollinated, and heirloom seeds?

SEED DEFINITIONS (JOHNNY'S SEEDS)

- 1. GMO or Genetically Modified Organisms
 - "The mechanical or biological transfer of genetic material outside of natural methods and between genera, families or kingdoms."
- 2. **Hybrid** "The offspring of a cross between two or more varieties, usually of the same species."
- 3. **Open-Pollinated** "A non-hybrid variety. One that can reproduce itself in kind."
- 4. **Heirloom** "An old variety that owes its present availability to the seed-saving efforts of amateurs." All heirlooms are open-pollinated.

ALL ABOUT SEEDS

- 1. GMO seeds have serious health and environmental concerns that continue to mount.
- 2. Hybrid seeds are not "evil." We are all hybrids!
- 3. Hybrid seeds can have added vigor, uniformity and disease resistance.
- 4. Hybrid seeds will not reproduce "true to type."

ALL ABOUT SEEDS

- 1. There is evidence that nutritional content may be superior in open-pollinated varieties.
- 2. If you want to save your own seed, you need to use open-pollinated seeds.
- 3. Saving seed is unique to different plants. You need a good book to guide you.

 - 2. How to do it (ACTION)
 - 3. And doing it at the right time (TIMING)
- 3. Power of the "Perpetual Harvest Hack"

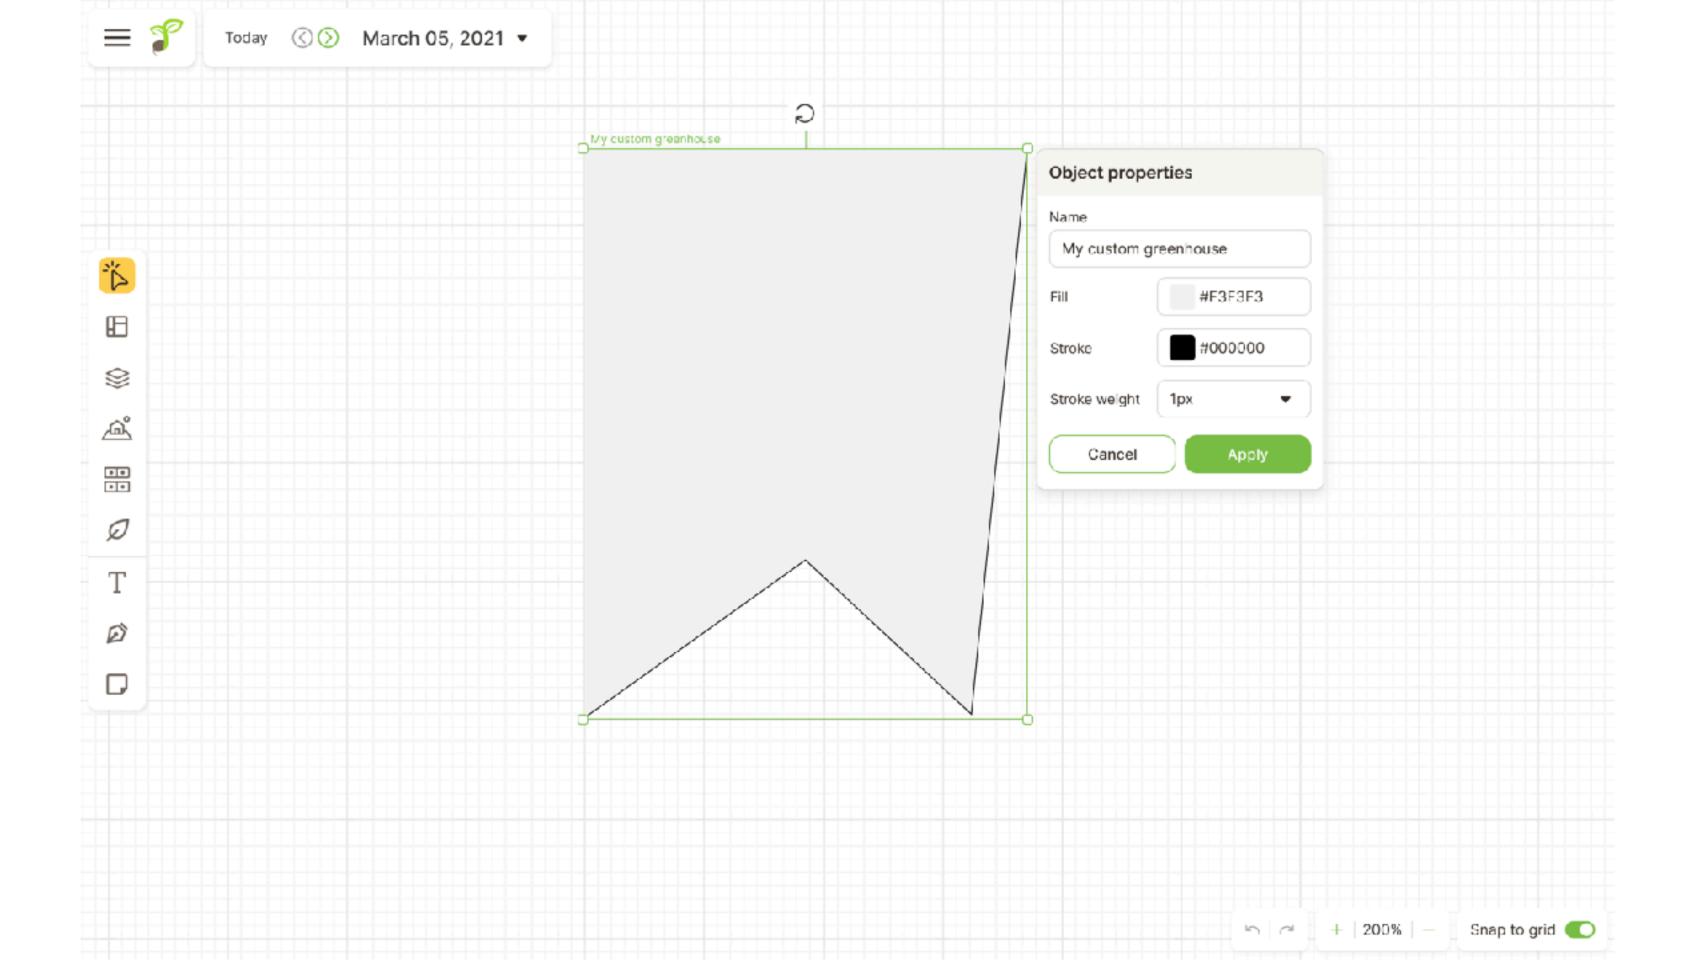

SEEDTIME LAYOUT

Imagine being able to not only track the timing of your crops, but be able to visually track where they will be growing in your garden at the same time.

Oh yeah! Now we're talking...

SEEDTIME WEATHER

What if historical weather data and forecasting was integrated directly into your gardening calendar?

Sound like a dream?

SEEDTIME INVENTORY

Tired of sifting through random half-used seed packets?

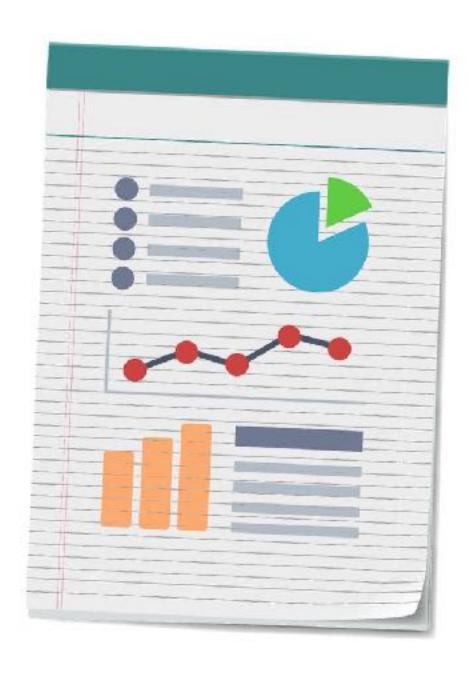

Never sure what you have on hand or what you need to purchase?

SEEDTIME RECORDS

Are you crazy about records?

Or just wish you could <u>keep</u> track of how many tomatoes you were able to harvest?

SEEDTIME ANALYTICS

Records are awesome.

Spreadsheets and columns full of numbers <u>can be</u> overwhelming and/or <u>mind</u> boggling.

Came in last... but just have to say I am loving this app! I'm a fairly new gardener and this is sooooo helpful!

I'm using my calendar for the first time, to plan my first ever fall gardening attempt. It's been helpful in knowing what I can and can not plant now before our first frost and what can go past those firsts frosts.

I have been gardening since I was in my mid 20s. I'm now in my mid 60s. I started using the earliest version of Seed time when it first came out. My fall and winter garden last year was the best ever, because the guess work of when to plant was simplified and so easy. Can't wait to see how it will do again this fall and winter My summer garden this year has been challenging because of extreme heat. I love all the videos, helpful links and knowing I can get answers to my questions when I need help. Seed time is absolutely the best and I love it! Wish it had been around 40 years ago. It gives beginning and experienced gardeners tools to have the most productive and successful gardens and harvests. Thank you so much!

I'm planning a much larger fall/winter garden than I have in the past, with a mix of protected and unprotected growing spaces. It's a lot of different seeding dates to sort out and manage, and Seedtime definitely made it easier to plan and stay on task, and be confident that I am planting things at the right time. I'm looking forward to using it to plan my next spring garden!

Gardening Experience level:

Lets see I'm 35 so lets call it 30 years?

Seedtime Impact - Overall positive, a great improvement over my previous systems and has the potential to exceed functionality of any other similar programs I've tried. I found it easier to use/adjust than my own sheets, and love how customizable it is (I grow a lot of strange heirlooms.) Obviously it's still in development and there is room to improve utilization and features. I've compiled some more specific observations to include in sub-comments, but a lot of it echoes the sentiments of Mr. Pratt above.

I was introduced to gardening as a small child; my mom always had a huge garden where she grew a significant portion of our family's food. With the exception for a few short years living in apartments, I have always had some form of a vegetable garden. Seedtime has helped me organize and extend my growing season, first on the front end of the season & now on the back end. I live in zone 6a/b. As we head quickly towards fall, I am using the app to guide me in extending my gardening & harvests into the fall & then winter. This is exciting because in the past I this has been the time when I close up my garden for the winter. A quick note. I chose to entered into seedtime as a lifetime member b/c a quick review of the product/project in Kickstarter demonstrated that there was no way I could glean full use of the program out of just one season of gardening. I look forward to continuing to learn and increase my knowledge, harvests & enjoyment of gardening in many seasons to come.

TAKE YOUR GARDEN TO THE SKIES

Jan Johnson ▶ Born to Grow Family

I deliberately have a very small garden. Keep that in mind when you see this picture. This is my second batch of green beans and my first inkling of peas. I will be picking lettuce tomorrow. Since I have never grown anything

I am really happy.

LaRee Colburn So tell Natasha we really missed having her help abut we survived. I failed to mention that there were still 2 bags of beans waiting to be snapped in the refrigerator. So in this batch we canned 68 quarts and that gives

There was a very <u>noticeable</u> difference in the amount of fruitage this year compared to last year... I really got to give credit where credit is due, so I thank God and thank you for sharing the knowledge and wisdom to the masses."
